# *Weekly* **MORBIDITY REPORT**

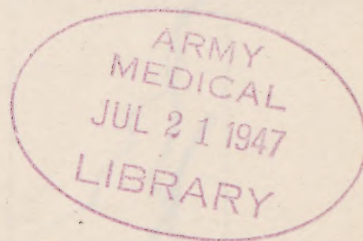

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 23 February 1946

REPORT NO. 217

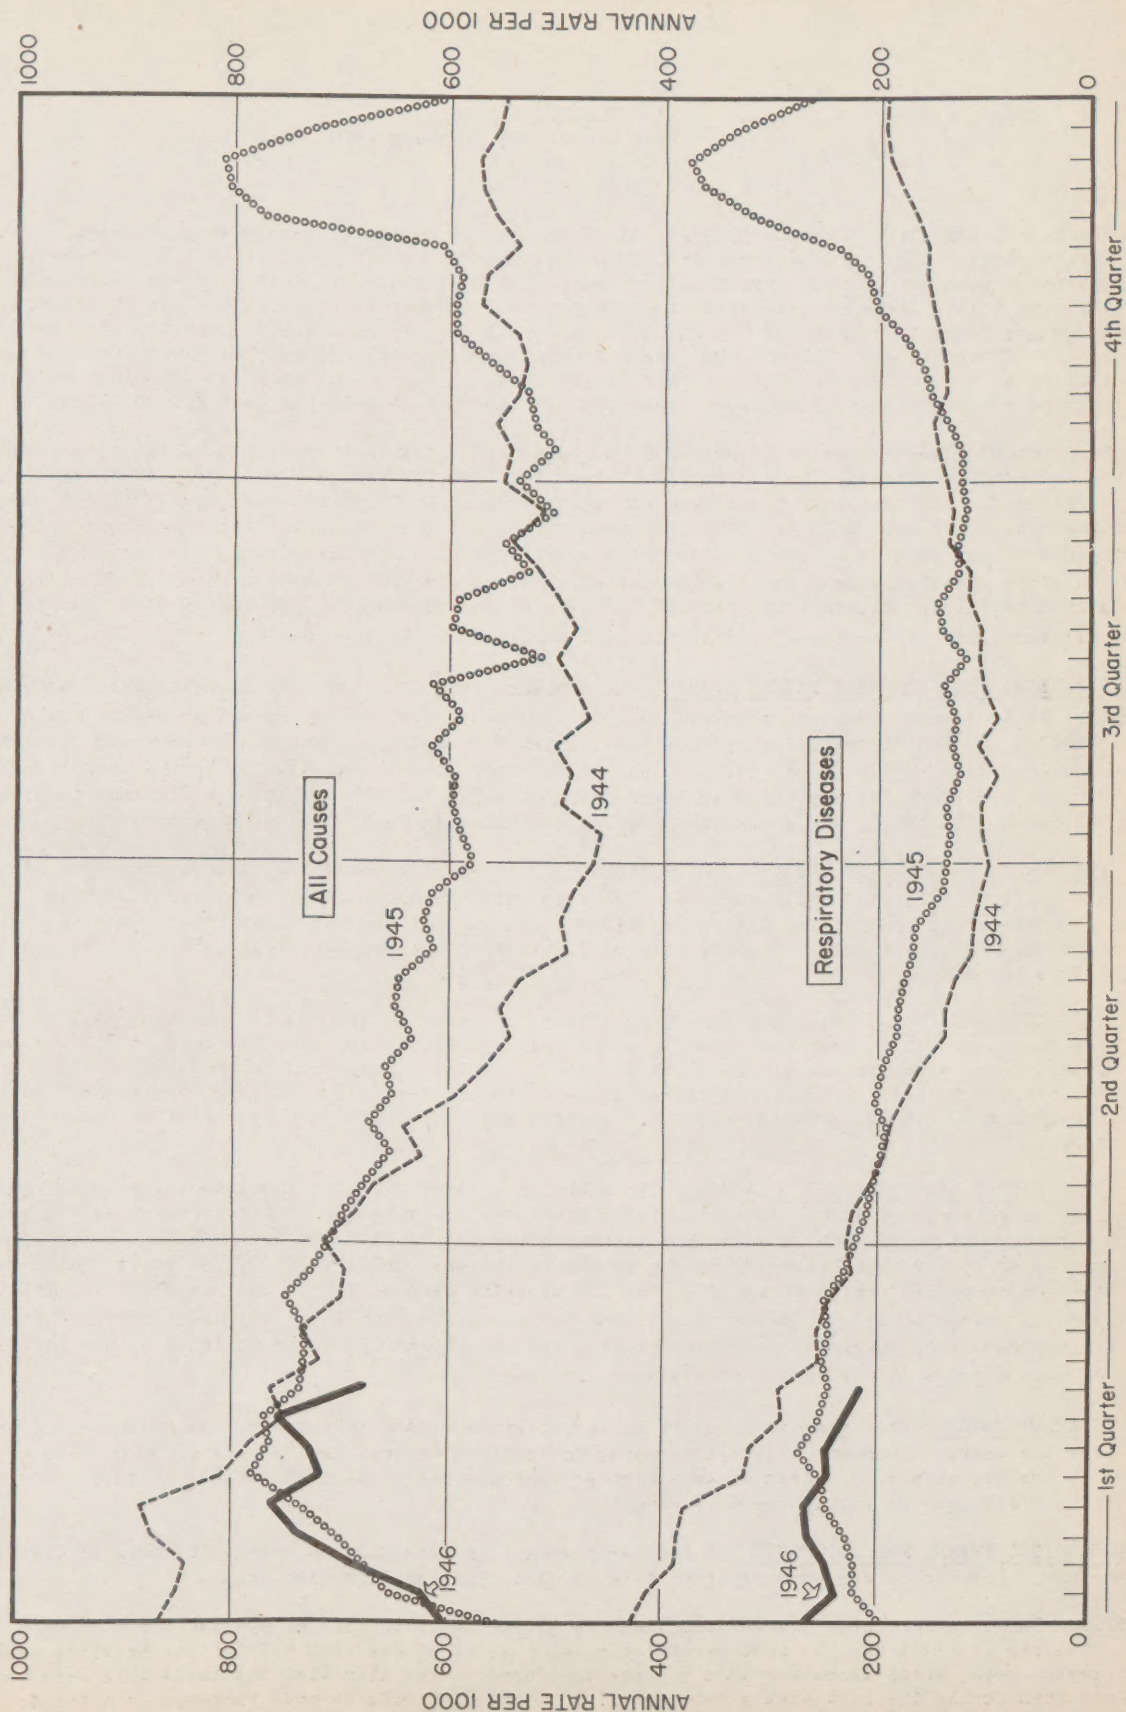

**RESTRICTED**—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

## ADMISSION RATES--ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES--1944 AND 1945.

# WEEKLY MORBIDITY REPORT

CURRENT TRENDS  
Week Ending 23 February 1946

The annual admission rate per 1000 for All Causes shows definite improvement this week, with a value of 676, marking better than a 10 per cent drop from last week's rate of 756; it is 8.3 per cent below the rate of 737 reported a year ago for the corresponding week. The improvement is fairly general among all Districts except the 5th, 6th, & 13th Districts. Highest improvements are in the 4th District and the Potomac and Severn River Commands whose respective rates of 409 and 443 are roughly 25 per cent below those for the previous week. The 1st and 11th Districts with 592 and 690, respectively, mark a nearly 21 per cent drop from the past week. On the other hand, the 6th District with a rate of 925 shows a 36 per cent increase over last week; the other two Districts have more moderate increases, 6 per cent for the 5th, and 12 per cent for the 13th.

Respiratory Diseases are still on the down grade with a combined rate of 214.0 as against 230.5 and 247.1 for the two previous weeks. The corresponding rate for last year was 244. As high as a 40 per cent drop is registered by the 4th District with a rate of 119.6 as against 200.3 the week before. The Potomac and Severn River Commands experience a 30 per cent drop from 117.4 last week to 81.7 this week, while further drops ranging from 6 per cent to 28 per cent are also experienced by other Districts. However, the 1st, 5th, 6th and 13th Districts show increases, notably the latter whose rate of 224.2 marks a 48 per cent rise over its past week's rate of 151.1. Although its rate of 347.4 is 11 per cent below last week's rate, the 9th District still leads all the others. The 7th District with 61.8 continues to be the lowest.

INFLUENZA AND CATARRHAL FEVER, ACUTE: The combined rate for these two diseases still continues to fall sharply; it is down to 132.5 as compared to 143.3 and 164.7 for the two preceding weeks, and to 156.6 a year ago. The 3rd and 4th Districts experience the largest drops, 30 per cent and 44 per cent respectively, with corresponding rates of 126.3 and 65.1. On the other hand, the 6th and 13th Districts show rises of 63 per cent and 44.5 per cent respectively, placing their rates at 167.6 and 154.5. The 5th District is clearly in the lead this week with 198.4, while the 7th District continues to be at the bottom with 34.4.

PNEUMONIA--BRONCHO AND LOBAR. The combined rate of 3.2 for these two diseases, marks a 33 per cent increase over the previous week, but still compares favorably with the value of 5.0 reported a year ago. The increase is quite general; only the Potomac and Severn River Commands, and the 6th District show a drop. The 1st, 7th and 13th Districts are stationary. Highest rate of 7.8 is from the 9th District. The 6th, 7th and 13th Districts reported no incidence.

PNEUMONIA, ATYPICAL. With the rate of 2.1, this disease has dropped to less than half of its rate for the previous week. It is very near what it was a year ago this time, when the rate of 2.0 was reported. Most significant drops occur in the 6th and 11th Districts, as these pass from 7.3 and 13.9 for the previous week, to their present rates of 2.4 and 5.4 respectively. The 1st, 3rd and 4th Districts remain stationary. The 11th District still leads. The 1st and 4th Districts and the Potomac and Severn River Commands have no incidences.

TONSILLITIS AND PHARYNGITIS, ACUTE. The combined rate of 76.3 for these two diseases marks a slight drop from last week's rate of 80.5. It is also slightly below the value of 80.0 reported a year ago. Appreciable drops are recorded by the 4th, 8th and 9th Districts and the Potomac and Severn River Commands, with the maximum drop of 45 per cent belonging to the latter as the rate falls to 20.0, the lowest value reported. The 4th District dropped 37 per cent to 52.5, the 8th District dropped 34 per cent to 23.9, the 9th District dropped 22 per cent to 153.9. Nevertheless, the latter rate is still the highest reported. The 13th District has the highest rise, nearly 52 per cent, placing its rate at 67.0; it is followed by the 1st District, whose rate of 60.6 marks a 31 per cent increase over last week.

SCARLET FEVER. This disease is still on the up grade with a rate of 16.0 as against 14.3 and 13.0 for the two previous weeks. However, it still compares favorably with last year's rate of 39.0. The 9th District is still at the top with 71.9, which marks a further increase over last week's value of 59.5. The 4th and 13th Districts still have no incidences this week.

CEREBROSPINAL FEVER, MENINGOCOCCIC. A further increase in this disease brings its rate to 0.2, the value reported a year ago. The incidences were reported from the 3rd, 5th and 11th Districts.

MEASLES. The rate for this disease jumped almost 50 per cent, to 13.4 as against 9.1 last week, and 9.0 a year ago. The 6th District has the most significant gain, as it passes from 4.8 for the previous week, to 26.7 for the present week, which is better than 5 times the former. The 11th District leads this week, with 35.8, which is more than double its last week's value of 17.4. More Districts to show increases are the 3rd, 4th, 5th, 7th and 8th. The others are either stationary or decreasing. The 7th District is lowest with 1.0.
